

IP Camera Family Brochure

Q4 2013

Why AVer IP cameras?

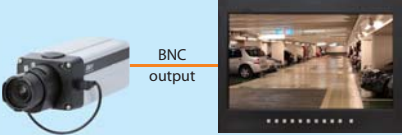

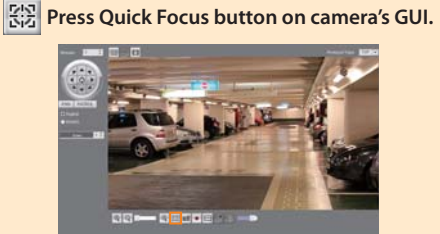

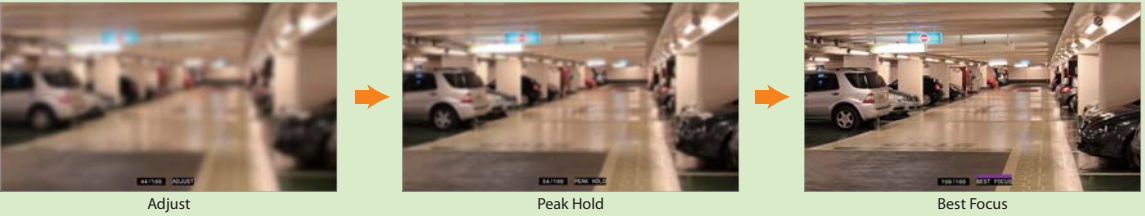

AVer's rich portfolio of megapixel IP cameras ranges from premium Rugged Series bullets and vandal domes to affordable wireless cubes, ceiling domes and box cameras, all of them deliver high definition recording and video preview with excellent image quality. The vast array of useful features available with AVer IP cameras guarantees easy setup process and optimized bandwidth / storage management, saving your time and money. Moreover, adopting AVer IP cameras allows you to enjoy a full backend management support including AVer DVRs/NVRs, VMS, CMS and mobile access applications. AVer not only provides you with a robust line of IP cameras, but also delivers a highly reliable and fully integrated IP surveillance solution.

Quick Focus

Thanks to a simple 3-step procedure, camera focus is adjusted quickly and precisely, saving time and efforts. Quick Focus can be accessed via a network using web GUI or a BNC monitor connected directly to a camera. During manual adjustment, built-in focus analyzer aids installers in finding the exact moment when the image is as sharp as possible.

Via BNC monitor	Via laptop
<p>Step 1: Connect</p> <p>Connect BNC monitor.</p> 	<p>Step 1: Connect</p> <p>Access camera's web UI via network.</p> 
<p>Step 2: Trigger</p> <p>Insert memory card with FocusAssistant.txt file to trigger.</p> 	<p>Step 2: Trigger</p> <p>Press Quick Focus button on camera's GUI.</p> 
<p>Step 3: Adjust</p> <p>Use lever/gimbals to change focus from min. to max. value, let the camera find the frequency peaks, keep manipulating until 'Best Focus' appears on the screen.</p> 	

MFZ (Motorized Focus and Zoom)

A built-in motorized lens allows for easy focus and zoom tuning remotely via the camera's GUI, so focal point and focal length can be changed anytime. Users can take full advantage of vari-focal lens with stepping motor and one-click focus adjustment to set camera's watchful eyes on the right spot. This function is especially recommended for remote, hard-to-reach locations or unsafe sites like tall buildings or utility poles.

- Use zoom in/out buttons to adjust focal length
- One-click on any object to focus manually or use Auto Focus

Smart Stream

Smart Stream feature optimizes bandwidth and storage space by allowing users to increase or decrease image quality for selected areas based upon criticality. Users can define up to 5 areas per stream so security personnel can quickly zero in on the key elements of the scene during preview and playback.

ROI (Region of Interest)

ROI is an image cropping feature designed to assist users in achieving bandwidth and storage optimization. Users can select up to 2 key regions of a scene to transmit as separate streams for targeted preview and recording.

Event Booster

Event Booster is an alarm option that allows for an instant frame rate boost under specified conditions. Thanks to reduced base frame rate users can save bandwidth and storage space, while ensuring emergency situations will be recorded at the maximum frame rate available.

Adjustable WDR (Wide Dynamic Range)

WDR technology ensures proper lighting contrast and image clarity when experiencing severe backlighting or glare. 3-megapixel AVer IP cameras (e.g. FX3000-R, FV3028-RT) come equipped with True WDR, a sensor-based WDR technology perfect for the most challenging lighting environments, while many other AVer IP cameras are equipped with Digital WDR (D-WDR). In addition, WDR level can be precisely adjusted to produce the best image under various lighting conditions.

Adjustable IR LED Strength

AVer IP cameras employ Osram IR LEDs, essentially guaranteeing excellent quality, long lifespan and energy efficiency. Built-in illuminators allow for manual adjustment of infrared light intensity (6 levels available). Users can access the camera's UI via the web to fine-tune IR level to fit specific location requirements, avoiding potential lighting issues like overexposure.

**Protect your assets
under the harshest conditions**

RUGGED

AVer Rugged Series

AVer Rugged Series IP cameras can handle anything you throw at them. These tough 3M and 2M bullets and vandal domes are designed for operation in the harshest outdoor environments and working conditions to ensure your property is safe. Rugged Series IP cameras adhere to the industry's strictest standards for protection against dust and water (IP68), vandalism (IK10), power surges (EN50130-4), and extreme temperatures to provide reliable IP surveillance in winter storms and steel mills, tropical typhoons and container ports. These tough cameras are fully prepared to operate 24 hours a day, with built-in mechanical ICR, adjustable Osram IR LEDs, and dynamic 2D/3D noise reduction (DNR) to capture quality surveillance footage in the dark of night and poorly lighted buildings. In addition, Rugged Series IP cameras are outfitted with a number of useful features including a motorized lens (MFZ), Smart Stream, ROI and local storage (up to 64GB).

Top-Notch Weatherproofing

Rugged Series IP cameras are outfitted with IP68-rated weatherproof housing, the highest attainable Ingress Protection rating. Each camera is dust-tight to prevent against damage due to foreign contaminants and waterproof to a degree that it can be continuously submerged in water at depths exceeding one meter.

Extreme Temperature Protection

Rugged Series IP cameras are designed to withstand extreme cold – -60°C for bullets and -50°C for vandal domes – and extreme heat – 60°C for bullets and 50°C for vandal domes. Thanks to built-in heaters and cooling components, these robust IP cameras will deliver clear imaging no matter whether it is freezing cold or scorching hot outside.

Robust Vandal-Proofing

Rugged Series vandal dome IP cameras have been tested against stringent mechanical impact standards, achieving the industry's highest mechanical protection rating – IK10. These robust models can withstand a strike with a steel bat of at least 20 joules, making it particularly well suited for environments prone to vandalism.

Enhanced Electromagnetic Resistance

With EN50130-4 electromagnetic compatibility certification for alarm systems, Rugged Series IP cameras present you with enhanced electric surge and electrostatic discharge resistance. Immune to power grid disturbances, the cameras will remain undamaged even during a severe thunderstorm.

Quality and Reliability Guaranteed

Rugged Series IP cameras are produced in AVer's factory in Taiwan, which is ISO 9001/14001/14064-1/28000, OHSAS 18001, IECQ QC 080000, Authorized Economic Operator (AEO), WEEE 2002/96/EC, ErP Directive 2009/125/EC, PAS 2050 and SONY Green Partner certified. In addition to adherence to strict production standards, AVer Rugged Series IP cameras feature an industry-leading 3-year warranty, attesting to its durability and reliability. In adopting the Rugged Series, you can rest assured that your property is well secured.

Next-generation full HD IP surveillance solution

Reliable performance · optimized bandwidth & storage · easy setup

The seamless integration between AVer IP cameras, DVRs/NVRs and central management software (CMS) not only provides reliability and enhanced performance but also guarantees easy setup thanks to the standardized user interface across all devices. Clever functions like Smart Stream and ROI create an optimized solution for bandwidth and storage efficiency. And, with regularly scheduled feature and performance upgrades, expect your AVer IP surveillance solution to actually get better with age, allowing you to save more on bandwidth and storage investment.

- Full line of AVer IP cameras
- E-series DVRs/NVRs
- Central management software CM5000

SDKs

Unified Software Development Kits available for AVer IP cameras and AVer DVRs/NVRs make it much easier to integrate AVer solution components with any of external systems. SDKs can significantly speed up customization process, saving your time and efforts.

CM5000 CMS

The all-new CM5000 central management software (CMS) is designed for remote management of AVer's next generation of DVRs/NVRs. Users can leverage CM5000 to remotely control E-series DVRs/NVRs, including support for live preview, instant playback, settings adjustment, and E-maps. Full GUI standardization between local (DVR/NVR) and remote (CMS) sites ensures a low learning curve and smooth everyday operation.

Integrated Setup with Standardized UI

With the complete integration between AVer IP cameras, E-series DVRs/NVRs, and CM5000, all camera settings, including not only the basic ones like IP address, but also camera-embedded advanced options like ROI, Smart Stream, motion detection or motorized focus/zoom (MFZ), can now be set directly via DVRs /NVRs and CMS interface.

Free Video Management Software (VMS) – NXU Lite

- Supports up to 32 IP camera channels
- Up to 5 megapixels per channel with a total of 80 megapixels for all channels
- Supports H.264 / MPEG-4 / MJPEG formats (tri-codec)
- Supports plug and play and Active IP with AVer IP cameras
- Step-by-step setup wizard for simplified system configuration
- Dual monitor application for the display of up to 8 E-maps
- Supports live playback, event search, intelligent search and visual search

Premium version of VMS software – **NXU8000** – is also available, offering enhanced functionality and additional advanced features.

* supported languages: English, Arabic, Bulgarian, Czech, Danish, Dutch, Finnish, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Norwegian, Polish, Portuguese, Romanian, Russian, Simplified Chinese, Slovak, Spanish, Swedish, Thai, Traditional Chinese, Turkish

Free Mobile Access Applications

- Access up to 32 camera channels with iViewer (iOS devices) or AndroidViewer (Android devices)
- View 4 channels at once and control PTZ cameras
- Make connection simple and secure with savable profiles, address book and authorization mechanism

Central Management Software (CMS) – CM3000 & CM3000 Gold

- Connect and control up to 1000 AVer DVRs, NVRs, and/or VMS
- Quad monitor support
- Supports up to 64 E-maps or Google maps to integrate and display incident alerts and live video
- Remote playback and backup for reviewing recorded video and retrieving critical images
- Advanced alarm center with multiple operator management
- Remote iAlarm for monitoring live alarm events and assigning them to remote managers
- Remote iMatrix for grouping up to 128 monitor views into myriad combinations to create a TV-wall command center
- Remote Setup for remote configuration of cameras, recordings, schedules and alarms
